Norton Model 7 Dominator 1950 500cc

Professionally rebuilt and refurbished this plunger model has had thousands of pounds spent on it to restore every part of the bike. Nothing has been overlooked to maintain originality with detail such as the stripes on the wheels and petrol tank that have been hand painted, these two items alone cost £1600.00 to restore by specialists.

Needless to say the engine and gearbox have been completely stripped and rebuilt to produce a very strong and powerful unit.

The bike has been in dry storage since it's completion in early 2013 and started periodically but never fully used on the road. The bike is immaculate in all respects and could be a potential show entry or museum piece for a future owner. Starts easily and has a smooth gear change, all electrics and suspension units are correct and in working order.

95% of the bike's parts that were retained and refurbished in the rebuild, using only a few pattern parts but this bike is stunning in all aspects.

Both the Model 7s up for sale differ slightly in the finish and paintwork but follow the specification of the year.
